

Startag

StarTag X3

Works with Apple Find My

Works with Android Find Hub

Model：StarTag X3

Battery：CR2032

Voltage：DC 3V

Wireless：BLE 5.4

System: iOS/Android™

Humidity range：≤95%（Non-condensing）

iOS requires a system version of 14.5 or above to function properly.
Android requires a system version of 12 or above to function properly.

Note: Not all Android devices are compatible and require factoryintegration with Google GMS for normal support

Rapidly press three times (quickly, without audible feedback) + hold down on the fourth press until a long beep is heard, successfully restoring factory settings and entering pairing mode. Timeout after 5 minutes.

To switch off the device: press and hold for 5 seconds

Apple operating steps:

Powering on the device

1. Remove the insulating tab to switch on the device. If no beep is heard, check the device status. Press the button once to hear the first beep. If the device does not emit a sound when the button is pressed, it is in standby mode. Press and hold the button for 2-3 seconds until you hear a melody; the device will then switch on and enter pairing mode. The session will time out after 5 minutes.

Pairing Devices

1. Open the "Find My" app.
2. Place the locator near your iPhone or iPad. Tap the "Devices" option, then tap the "+" icon. Select "Add Other Item", locate "StarTag X3", and tap "Connect".
3. Enter a name for your device and select an emoji.
4. Tap "Agree" to confirm this item will be linked to your Apple ID, completing the pairing process.

Play Sound

1. Open the Find My app, tap the Items tab, then select your item.
2. Tap Play Sound and the device will emit a beep, making it easier to locate.

Lost Mode

1. Open the Find My app, tap the "Items" option, then tap your item.
2. Under "Lost Mode", tap "Enable".
3. Read the instructions, tap "Continue" and enter a phone number or email address.
4. After confirming the details, customise your lost message, then tap "Activate" to complete setup.

Unpairing Devices

1. Open the Find My app, tap the "Items" option, then select your item.
2. Tap "Remove Item", then tap "Remove" to unpair.

Note: After removing a device in the app, if you wish to pair it again, open the Find My app within two minutes. If pairing fails within this timeframe, the device will exit pairing mode and cannot be paired with the app. To re-pair the device, press the locator button again to wake it(for buttonless locators, open the battery compartment and reinsert the battery to wake it). Upon hearing the startup chime, the device enters pairing mode and can be re-paired with the app.

Android™ operating steps:

1. Before connecting, ensure that your phone's Bluetooth is turned on and the WiFi or cellular network signal is at full strength.
2. Pull out the battery insulation tab to power on the device. Your phone will automatically prompt the product connection page immediately.
3. Click "Connect".
4. Read "Use Responsibly" and click "Agree and Continue".
5. Once connected, click "Open App" to be redirected to the product management page.

download and install the Find Hub app on Google Play:

1.Open the Google Play on your Android device.

2.Search for "Find Hub".

3.Verify the developer is Google LLC.

4.Tap "Install" to complete the process.

Important Notes:

1.System Requirements: Requires Android 9 or later, and the device must be logged into a Google Account.

2.Google's Find Hub needs to be updated to the latest version on the Google Play Store, and Google Services need to be updated on mobile phones.

3.Permission Settings: Ensure that "Location Services" and "Device Bluetooth" are turned on. Permissions are enabled.

4.Security Warning: Avoid downloading APK files from unknown sources to prevent malware risks.

Battery replacement

1.Open the back battery cover

2.Replace the battery with a new CR2032 battery 3V. (Positive poleupward)

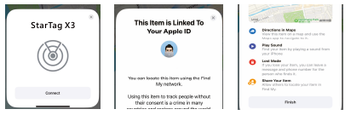

3.Carefully close the Item Locator.

Pair StarTag X3 to iPhone (iOS)

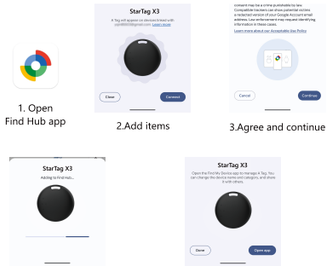

1. Open Find My app
2.Add items
3.Add other supported items

4.Search StarTag X3
5.Agree to register
6.Complete er gistration

Pair StarTag X3 with overseas Android devices

1. Open Find Hub app
2.Add items
3.Agree and continue
4.Wait for connection
5.Connection successful
